

JOHN C. GIFFORD ARBORETUM

DEPARTMENT OF BIOLOGY

UNIVERSITY OF MIAMI

A Living Collection of Tropical Trees

- *Family and Order Exhibits*
each is a lineage of trees with shared evolved characteristics
- *Basal Angiosperms & Gymnosperms Exhibits*
several distinct lineages that retain ancient characteristics
- *South Florida Natives Exhibit*
- *“What is a Tree?” Exhibit*
- *Maya Cocoa Garden Exhibit*
- *Taylor Alexander Microbiome*
reconstruction of a native pond and forest

Locate the NEW exhibits on the map inside and wander the trails to view the plants. You will discover an amazing array of forms, textures and scents: leaves, trunks, flowers, fruits and chemistry, providing food, fiber, medicine, perfume and more, not to mention wood. Enjoy!

CHECKLIST OF PLANTS

March, 2008

Limited Edition

PREPARED BY John Cozza, Eric Manzané, Aldridge Curators
& Carol C. Horvitz
