Lisa D. Anness Fellowship in Tropical Plant Biology at the University of Miami

Study Botany in Miami, the gateway to the tropics and the only locale in the continental US where tropical plants abound in gardens and natural areas within minutes of the University.

The Lisa D. Anness Fellow receives 3 years of fellowship (competitive stipend plus tuition waiver) and 2 years of TA or RA funding as needed. The holder will be an exceptional student scholar of the University of Miami Ph.D. program in Biology, co-mentored by researchers at UM and the Fairchild Tropical Botanic Garden.

Research Areas:

- Tropical plant systematics and evolution
- Structure and function of tropical plants
- Physiological ecology
- Modeling population, community and ecosystem dynamics
- Applied conservation biology
- Tropical forest ecology and management

Applicants for the Anness Fellowship should contact potential mentors from both the University of Miami and the Fairchild Tropical Botanic Garden. Information on applying to the UM graduate program can be found at http://www.as.miami.edu/biology/graduate/ Applications for the UM graduate program are due December 1 for admission the following Fall.
