Lisa D. Anness Fellowship in Tropical Plant Biology at the University of Miami

Study Botany in Miami, the only locale in the continental US where tropical plants abound in gardens and natural areas within minutes of your classroom.

The Lisa D. Anness Fellow receives 3 years of fellowship (stipend of $20K and tuition waived), plus modest research funds, and 2 years of TA or RA funding, as needed. The holder will be an exceptional student scholar of the University of Miami Ph.D. program in Biology, co-mentored by researchers at UM and the Fairchild Tropical Botanic Garden.

Research areas:

- Palm Biology
- Tropical Mycorrhizas
- Tropical Plant Systematics
- Applied Conservation Biology
- Structure & Function of Tropical Plants
- Physiological Ecology of Tropical Plants
- Modeling Population, Community or Ecosystem Dynamics
- Tropical Forest Ecology and management

Applicants for the Anness Fellowship should contact potential mentors from both The University of Miami and Fairchild Tropical Botanic Garden. Information on applying to the UM graduate program can be found at http://www.bio.miami.edu/grad.html. Applications for the UM graduate program are due December 1 for admission for the following Fall.
